

We are of the opinion that the best craftman's tool is only just good enough — and we act accordingly. That is why we have developed this new and much better plane which is a great deal easier to handle.

E. C. E. - PRIMUS - Plane (pat.)

*adjustable without
a hammer!*

The Primus-Plane has outstanding advantages!

- ① "Precise and positive depth adjustment."
- ② "Lever regulation for parallelism."
- ③ "Clear chip flow through the Plane."
- ④ "Dismantled and tensioned by screwing — not wedging and hammering."

Every PRIMUS-Plane is of course fitted with a first-class surface ground plane iron and is (honed) ready for use.

Quality Planes from the largest and oldest established Factory for Planes and Plane Irons
In Western Germany.
